13  
14 Attorneys for Intervenor Defendant  
United States Environmental  
Protection Agency

15  
16 PANNER, J.  
Plaintiffs Daryl Hawes, Barbara Hawes, the Baker  
17 County Farm Bureau, and the Baker County Livestock Association  
18 bring this action for declaratory and injunctive relief  
19 against defendant State of Oregon (the State). Plaintiffs  
20 contend that the State illegally entered into a Memorandum of  
21 Agreement with the federal Environmental Protection Agency  
22 (EPA) to apply Total Maximum Daily Load (TMDL) requirements to  
23 streams that are being polluted by only non-point sources of  
24 contamination, such as farm runoff. The EPA has intervened as  
25

26 2 - OPINION

1 provides that the DEQ must develop TMDLs for all water quality  
2 limited streams in the state, including streams polluted only  
3 by nonpoint sources.

4           The Memorandum of Agreement provides that the DEQ  
5 is to complete TMDLs on a timetable running to June 30, 2007.  
6 The DEQ is scheduled to create TMDLs for streams in Baker  
7 County in 2005. The EPA will consider a TMDL timely if it is  
8 received within one year of the date it is scheduled for  
9 completion.

10           Plaintiffs seek a declaration that the State's  
11 Memorandum of Agreement with the EPA is illegal. Plaintiffs  
12 bring claims under state law for judicial review of an agency  
13 order, and for declaratory and injunctive relief.

#### 14                           **STANDARDS**

15           The court must grant summary judgment if there are  
16 no genuine issues of material fact and the moving party is  
17 entitled to judgment as a matter of law. Fed. R. Civ. P.  
18 56(c). If the moving party shows that there are no genuine  
19 issues of material fact, the nonmoving party must go beyond  
20 the pleadings and designate facts showing an issue for trial.  
21 Celotex Corp. v. Catrett, 477 U.S. 317, 322-23 (1986).

22           The substantive law governing a claim or defense  
23 determines whether a fact is material. T.W. Elec. Serv., Inc.  
24 v. Pacific Elec. Contractors Ass'n, 809 F.2d 626, 630 (9th  
25 Cir. 1987). The court should resolve reasonable doubts about

1 the existence of an issue of material fact against the moving  
2 party. Id. at 631. The court should view inferences drawn  
3 from the facts in the light most favorable to the nonmoving  
4 party. Id. at 630-31.

## 5 DISCUSSION

6 This court lacks subject matter jurisdiction  
7 because plaintiffs' claims are not ripe and because plaintiffs  
8 lack standing.

### 9 I. Ripeness

#### 10 A. Standards

11 Ripeness is "'a question of timing.'" Bonnichsen  
12 v. United States, 969 F. Supp. 614, 619 (D. Or. 1997) (quoting  
13 Regional Rail Reorganization Act Cases, 419 U.S. 102, 140  
14 (1974)). The ripeness doctrine is intended "to prevent the  
15 courts, through avoidance of premature adjudication, from  
16 entangling themselves in abstract disagreements." Abbott  
17 Laboratories v. Gardner, 387 U.S. 136, 148 (1967).

18 In determining ripeness, the court should consider  
19 constitutional and prudential factors. See Thomas v.  
20 Anchorage Equal Rights Comm'n, 220 F.3d 1134, 1138 (9th Cir.  
21 2000) (en banc), cert. denied, 121 S. Ct. 1078 (2001). The  
22 court's constitutional inquiry looks to whether the issues are  
23 "'definite and concrete,'" or "'hypothetical or abstract.'" Id.  
24 at 1139 (quoting Railway Mail Ass'n v. Corsi, 326 U.S. 88,  
25 93 (1945)). The court's prudential inquiry focuses on "'the

1 fitness of the issues for judicial decision and the hardship  
2 to the parties of withholding court consideration.'" Id. at  
3 1141 (quoting Abbott Labs., 387 U.S. at 149). The party  
4 asserting jurisdiction bears the burden of establishing it.  
5 Kokkonen v. Guardian Life Ins. Co., 511 U.S. 375, 377 (1994).

6  
7 **B. Discussion**

8 A claim is not ripe if it depends on possible  
9 future events that may never occur. Barapind v. Reno, 225  
10 F.3d 1100, 1114 (9th Cir. 2000). Here, the DEQ will not  
11 create TMDLs for streams in Baker County until at least 2005.

12 Plaintiffs have not shown that the mere existence  
13 of the Memorandum of Agreement, without more, causes any  
14 legally cognizable injury to them. "Even when the agency  
15 action challenged is 'final' and the issues raised are purely  
16 legal, a case is not ripe for adjudication absent the threat  
17 of significant and immediate impact on the plaintiff." Kerr-  
18 McGee

19 Chem. Corp. v. United States Dep't of the Interior, 709 F.2d  
20 597, 600 (9th Cir. 1983).

21 In Ohio Forestry Association, Inc. v. Sierra Club,  
22 523 U.S. 726, 733 (1998), the Sierra Club challenged a United  
23 States Forest Service plan for a national forest, contending  
24 that the plan would permit too much logging and clear cutting.  
25 The Supreme Court held that the Sierra Club's claims were not

1 ripe, even though the plan made logging possible and even  
2 likely, because the plan itself did "not authorize the cutting  
3 of any trees." Id., 523 U.S. at 729. Similarly, here the  
4 State's Memorandum of Agreement does not by itself set TMDLs  
5 for streams in Baker County.

6           The court should not attempt to resolve a legal  
7 issue in the abstract before the plaintiff has been injured or  
8 is threatened with an immediate injury. Plaintiffs have not  
9 shown that they would suffer hardship if I do not address the  
10 merits of their claims now. Cf. Association of American  
11 Medical Colleges v. United States, 217 F.3d 770, 783-84 (9th  
12 Cir. 2000) (noting exception to ripeness doctrine when  
13 challenged government action forces the plaintiff to make a  
14 "Hobson's choice"). Plaintiffs may challenge the State's  
15 authority to create TMDLs if and when plaintiffs are in fact  
16 injured by them. See Pronsolino v. Marcus, 91 F. Supp. 2d  
17 1337, 1355 (N.D. Cal. 2000) (under similar facts, court noted  
18 that plaintiffs could "appeal unreasonable or  
19 unauthorized restrictions within the state administrative  
20 system").

## 21 **II. Standing**

### 22 **A. Standards**

23           The analysis for ripeness and standing often  
24 overlap. See Thomas, 220 F.3d at 1139. To establish  
25 standing, plaintiffs must show that they have suffered an

1 injury in fact because of defendants' conduct, and that the  
2 injury would be redressed by a decision in their favor. See  
3 On the Green Apartments L.L.C. v. City of Tacoma, 241 F.3d  
4 1235, 1239 (9th Cir. 2001). An injury in fact is "'an  
5 invasion of a legally protected interest which is (a) concrete  
6 and particularized, and (b) actual or imminent, not  
7 conjectural or hypothetical.'" Lee v. State of Oregon, 107  
8 F.3d 1382, 1387 (9th Cir. 1997) (quoting Lujan v. Defenders of  
9 Wildlife, 504 U.S. 555, 560 (1992)). Plaintiffs must also  
10 satisfy "the prudential component of standing; that is,  
11 [their] 'complaint must "fall within the zone of interests to  
12 be protected or regulated by the statute or constitutional  
13 guarantee in question.'" On the Green Apartments, 241 F.3d  
14 at 1239 (citations omitted).

#### 15 **B. Discussion**

16 To demonstrate standing, plaintiffs submit the  
17 affidavit of Daryl Hawes (Hawes). Hawes states that he is  
18 familiar with TMDLs imposed as part of the state's plan for  
19 the Grande Ronde Basin, which include a temperature TMDL  
20 requiring that no "heat load" originate from agricultural  
21 sources. The Clean Water Act defines "heat" as a pollutant,  
22 33 U.S.C. § 1362(6), and the EPA has stated that TMDLs must  
23 address the effects of heat caused by sunlight. Hawes  
24 "believe[s]" that a TMDL which limits heat load, if it were to  
25 be implemented for the Burnt River basin, would require him to

1 change his current methods of irrigation, cropping, stock-  
2 watering, and grazing.

3           The Hawes affidavit shows that plaintiffs lack  
4 standing. Plaintiffs are speculating that if and when the DEQ  
5 creates a TMDL for the Burnt River basin, the TMDL will be  
6 similar to the TMDL for the Grande Ronde Basin. The  
7 Memorandum of Agreement has not injured plaintiffs. Article  
8 III requires that a plaintiff establish a more concrete and  
9 immediate injury.

10           Because I conclude that this court lacks subject  
11 matter jurisdiction over plaintiffs' claims, I will not  
12 address the merits of their claims. See Wilson v. A.H. Belo  
13 Corp., 87 F.3d 393, 400 (9th Cir. 1996).

### 14 **III. Remand**

15           The parties dispute whether this case should be  
16 remanded to state court or simply dismissed. When a case has  
17 been removed from state court, "[i]f at any time before final  
18 judgment it appears that the district court lacks subject  
19 matter jurisdiction, the case shall be remanded." 28 U.S.C. §  
20 1447(c). Despite § 1447(c)'s apparently mandatory wording,  
21 the Ninth  
22 Circuit recognizes an exception if remand would be futile.  
23 See Bell v. City of Kellogg, 922 F.2d 1418, 1424-25 (9th Cir.  
24 1991).

25           In Bell, the Ninth Circuit set a high standard for

1 futility. The Ninth Circuit quoted dictum from a First Circuit  
2 decision that recognized a possible exception when there is  
3 "'an absolute certainty that remand would prove futile.'" Id.  
4 at 1425 (quoting M.A.I.N. v. Commissioner, Maine Dep't of  
5 Human Servs., 876 F.2d 1051, 1054 (1st Cir. 1989) (Breyer,  
6 J.)). In Bell, the court concluded that remand would be  
7 futile because the plaintiffs had failed to post a bond  
8 required by state law, which would have been fatal to their  
9 claims in state court.

10 / / /

11 Other circuits have expressly rejected Bell's  
12 reasoning, holding that § 1447(c) requires remand regardless  
13 of futility. See Bromwell v. Michigan Mut. Ins. Co., 115 F.3d  
14 208, 213-14 (3d Cir. 1997) (stating that only Fifth and Ninth  
15 Circuits recognize futility exception) (citing Bell and  
16 Asarco, Inc. v. Glenara, Ltd., 912 F.2d 784, 787 (5th Cir.  
17 1990)). The Ninth Circuit itself did not cite Bell in holding  
18 that § 1447(c) "is mandatory, not discretionary." Bruns v.  
19 National Credit Union Admin., 122 F.3d 1251, 1257 (9th Cir.  
20 1997) (citing decisions from the Fourth and Seventh Circuits).

21  
22 Here, assuming that Bell remains good law, I  
23 conclude that defendants have not made a sufficient showing  
24 that remand to state court would necessarily be futile. See  
25 M.A.I.N., 876 F.2d at 1054. Oregon courts apply their own

standards for ripeness and standing, which are not identical to federal standards. See, e.g., Curran v. Oregon Dep't of Transp., 151 Or. App. 781, 786-87, 951 P.2d 183, 186 (1997) (ripeness under Oregon law); People for Ethical Treatment of Animals v. Institutional Animal Care, 312 Or. 95, 101-02, 817 P.2d 1299, 1303 (1991) (standing under Oregon law).

#### CONCLUSION

Plaintiffs' motion for summary judgment (#43) is denied. Defendants' motions for summary judgment (##51, 53, 58)

/ / /

/ / /

are granted. This action is dismissed without prejudice for lack of subject matter jurisdiction and remanded to state court.

DATED this 27th day of April, 2001.

/s/ Owen M. Panner

---

OWEN M. PANNER  
U.S. DISTRICT COURT JUDGE
